Traver IDC Earns EASA Accreditation

ST. LOUIS, MO, USA – January 27, 2021 – FOR IMMEDIATE RELEASE – The Electrical Apparatus Service Association (EASA) announces the approval of Traver IDC in Waterbury, Connecticut, as an EASA Accredited Service Center.

Traver IDC is one of 147 companies worldwide to carry this Accreditation.

The EASA Accreditation of Traver IDC means the firm successfully demonstrated that it follows the prescribed good practices to consistently deliver quality electromechanical repairs that maintain or improve AC electric motor efficiency and reliability.

“Traver IDC’s achievement affirms the company’s commitment to excellence,” said Linda J. Raynes, CAE, EASA President & CEO. “EASA’s Accreditation Program offers external validation that the company adheres to good practices by submitting to an independent, third-party audit.”

The criteria for becoming EASA Accredited are based on *ANSI/EASA AR100: Recommended Practice for the Repair of Rotating Electrical Apparatus* and The Good Practice Guide of *The Effect of Repair/Rewinding on Motor Efficiency*.

EASA is The Electro•Mechanical Authority, an international trade organization consisting of more than 1,700 electromechanical sales and service firms in 70 countries. EASA member companies provide repair, service and sales for the operation and maintenance of electric motors, generators, drives, controls, pumps and other electromechanical equipment. The Association provides members with direct technical support, the industry repair standard (ANSI/EASA AR100) and education, as well as technical, management and safety-related reference materials.
